

People Don't read your post

✗ Because you always **Align wrongly with a content**

Desing: Here you can see the graphic design how they have use the colour gradients and the product placement.

Content: The given content in this ad copy is not much in effective to the viewers and also not conveying the product.

logo placements: The logo should be placed in the 'wright way so that the viewers gets the eye stuck in it.

✓ Always use **Left- To- Right Alignment**

Desing: We concentrate mainly on design so that it makes impact on the product and also maintain the colour gradients according to the product colours.

content: We write content only in few words so that it convey the viewers in most effectively.

logo placement: The product identity will be placed in the right way so that the viewers can identify the product.

1. We place the product in the center because the viewer eye will go towards the product in the creative. It is the human nature in seeing the ad copy where is the product is placed and how creatively we carry the ad copy.

2 & 3

The logo should be placed in the top right or in top left because it carries the brand strength and it is the metrics which should be followed in the ad copy creation.

4 & 5

The viwers will drop down their eye balls down wards to the creative to see the address, this is the reason we place the address in the bottom of the creatives.
